

Kidney Transplant Trial Watch

October 2013

The **Kidney Transplant Trial Watch** keeps you informed about recently published RCTs in Kidney Transplantation.

We carefully select new RCTs and include a brief description, an assessment of the reporting of methodological quality features, and the main **conclusions** of the report written by the Centre for Evidence in Transplantation (CET).

**All Evidence in (Kidney) Transplantation is available in the
Transplant Library database!**

October 2013

Kidney transplantation

- [Treatment with everolimus is associated with a procoagulant state.](#)

Baas MC, Gerdes VE, et al. Thrombosis Research 2013; 132 (2): 307–311

- **A comparative, randomized trial of concentration-controlled sirolimus combined with reduced-dose tacrolimus or standard-dose tacrolimus in renal allograft recipients.**
Bechstein WO, Paczek L, et al. Transplantation Proceedings 2013; 45(6): 2133-2140.
- **A randomized pilot study of donor stem cell infusion in living-related kidney transplant recipients receiving alemtuzumab.**
Ciancio G, Sageshima J, et al. Transplantation [record in progress].
- **A comparison between two tacrolimus-based immunosuppression regimens in renal transplant recipients: 7-year follow-up.**
Foroncewicz B, Mucha K, et al. Annals of Transplantation 2013; 18: 384-392.
- **Quinolone prophylaxis for the prevention of BK virus infection in kidney transplantation: study protocol for a randomized controlled trial.**
Humar A, Gill J, et al. Trials 2013; 14: 185.
- **Incision length for kidney transplantation does not influence short- or long-term outcome: a prospective randomized controlled trial.**
Malinka T, Banz VM, et al. Clinical Transplantation [record in progress].

Evidence in Kidney Transplantation!

(Kidney) Transplant Professionals should have access to all available evidence in their field. The Transplant Library provides this in a very easy way. Having access to high quality information promotes the use of evidence-based treatments in daily clinical care.
