

Kidney Transplant Trial Watch: April 2014

Dear RenalMed visitors,

Here's your monthly Kidney Transplant Trial Watch that keeps you informed about the latest evidence-based publications on kidney transplantation.

Each article in this Trial Watch is included in the Transplant Library database and has an Expert Review from the Centre for Evidence in Transplantation. **Free trial access** can be requested.

You can now also **Follow us** on LinkedIn for immediate updates on the most recently added evidence-based information on transplantation medicine.

Kidney Transplantation - most recent evidence

Prospective Randomized Controlled Trial of Rabbit Antithymocyte Globulin Compared With IL-2 Receptor Antagonist Induction Therapy in Kidney Transplantation

Pilch, N. A. ; Taber, D. J. ; Moussa, O. ; Thomas, B. ; Denmark, S. ; Meadows, H. B. ; McGillicuddy, J. W. ; Srinivas, T. R. ; Baliga, P. K. ; Chavin, K. D.
Annals of Surgery. 2014;[record in progress].

Most Popular Article in March 2014:

Can a combined screening/treatment programme prevent premature failure of renal transplants due to chronic rejection in patients with HLA antibodies: study protocol for the multicentre randomised controlled OuTSMART trial

Congratulations Dr. Anthony Dorling from the MRC Centre for Transplantation, King's College London, Guy's Hospital, London, UK

Get Full Access Now

Many thousands of transplant professionals now have access to the Transplant Library database either via their transplant society or their institution, and our community is growing rapidly. If you also want to benefit from having unrestricted, ongoing access to all available evidence-based publications on organ transplantation, request a **quotation** for an annual institutional subscription to the Transplant Library database. To experience its value first on a trial basis, request a personalised **free trial** now.

Did you Know?

Next to the Transplant Library database, Evidentia Publishing has also developed the Transfusion Evidence Library, which consists of systematic reviews, randomized controlled trials (RCTs) and health economic evaluations. It is a unique resource for clinicians, scientists and policy makers from around the world who are interested in the science and practice of blood transfusion and blood alternatives. **Free trials** are available upon request.
